

The Sonoma County Water Agency invites you to attend a community workshop to discuss economic costs and benefits resulting from proposed changes to minimum instream flows in Dry Creek and the Russian River.

Tuesday, November 9, 2004

Guerneville Veteran's Hall

First and Church Streets

6:30 p.m. to 9 p.m.

The Russian River Biological Assessment describes the proposed changes to minimum instream flows in the Russian River. The Flow Proposal is subject to further review under the California Environmental Quality Act and National Environmental Policy Act. As part of this review process, the Agency has hired a consultant team to develop a Scope of Work for an economic analysis of the Flow Proposal.

At this community workshop, we will be seeking public input to identify relevant categories of economic costs and benefits to be considered in the economic analysis Scope of Work.

For more information regarding this workshop,
call Jessica Martini at 707/547-1903.
